JOURNAL OF APPLIED ELECTROCHEMISTRY **23** (1993) 1329–1332

Index to Volume 23 (1993)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and protection

The nature of the passive film on cathodically modified stainless steels, 11
Estimation of corrosion conditions of a phosphoric acid fuel cell, 19
Interpretation des diagrammes *E*-pH du systeme Fe–H_2O en relation avec la fragilisation caustique des aciers, 72
Aluminium alloys in sulphuric acid Part I: Electrochemical behaviour of rotating and stationary disc electrodes, 125
Electrochemical determination of rusted steel surface stability, 157
Ac impedance spectroscopy of calcium carbonate scales, 203
Potentiostatic passivation of zinc in alkaline solutions, 371
Influence of potential on the friction and wear of mild steel in a model aqueous lubricant, 456
Galvanic black anodizing on Mg–Li alloys, 500
Investigations of nonlinear processes by transients: kinetics of dissolution of inhibitor layers on copper, 606
Electropolymérisation de monomére 3-amino-1,2,4-triazole sur une electrode de cuivre et effet du polymére sur la corrosion de l'electrode en milieu NaCI 3%, 835
Effect of impurities on the corrosion behaviour of neodymium, 1017
Kinetic model of anodic oxidation of titanium in sulphuric acid, 1056
Phenol electropolymerization on phosphated mild steel via zinc electrodeposition, 1069
Potentiodynamic estimation of sensitization of 347 grade SS superheater tubes Part I: Effect of surface finish, scan rate and solution temperature, 1097
Corrosion and hydrogen surface embrittlement inhibition of amorphous FeBSiC alloy in molar HCI by diorthoaminodiphenyldisulphane (DOAPD), 1132
Analysis of spontaneous electrochemical noise for corrosion studies, 1223
Electrochemical passivation of copper–aluminium–silver alloy in sodium hydroxide solution, 1280
A model of the electrochemical behaviour within a stress corrosion crack, 1310

Effluent and water treatment

Electrochemical oxidation of phenol for wastewater treatment using SnO_2 anodes, 108
Redox chemistry of H_2S oxidation in the British Gas Stretford Process Part I: Thermodynamics of sulphur-water systems at 298 K, 279
Redox chemistry of H_2S oxidation in the British Gas Stretford Process Part II: Electrochemical behaviour of aqueous hydrosulphide (HS^-) solutions, 287
Redox chemistry of H_2S oxidation in the British Gas Stretford Process Part III: Electrochemical behaviour of anthraquinone 2,7 disulphonate in alkaline electrolytes, 296
Redox chemistry of H_2S oxidation in the British Gas Stretford process Part IV: V–S–H_2O thermodynamics and aqueous vanadium (v) reduction in alkaline solutions, 417
Redox chemistry of H_2S oxidation in the British Gas Stretford process Part V: Aspects of the process chemistry, 427

Electrocatalysis and kinetics

Methanol oxidation at carbon supported Pt and Pt–Ru electrodes: an on line MS study using technical electrodes, 120
Hydrogen evolution reaction on Ni–Al electrodes, 135
Electrochemical and reflectance study of the conversion of zinc oxide by hexacyanoferrate (II) in offset lithography Part II: Zinc electrochemistry in sodium dihydrogen phosphate together with other minor components, 187
Electrochemical and reflectance study of the conversion of zinc oxide by hexacyanoferrate (II) in offset lithography Part III: Zinc electrochemistry in hexacyanoferrate (II) and minor components, 190
Direct electrooxidation of methanol on highly dispersed platinum-based catalyst electrodes: temperature effect, 197
Oxygen reduction on stainless steel, 352
Effect of cobalt deposits on nickel substrates on the oxygen evolution reaction in KOH, 379
A mixture design approach to the service life and the oxygen evolving catalytic activity of the Ru–Sn–Ti ternary oxide coated electrodes, 487
Combined radiometric and electrochemical study of the behaviour of Tc(VII) ions at gold and platinized surfaces in acidic media, 547
Cathodic behaviour of IrO_2 electrodes in alkaline solution Part I: Electrochemical surface characterization, 559
The electrocatalytic behaviour of palladium in acid and base, 573
Analysis of irreversible oxidation wave of adsorbed CO at Pt(111), Pt(100) and Pt(110) electrodes, 589
Temperature dependence of the Tafel slope for oxygen reduction on platinum in concentrated phosphoric acid, 597
Thermoanalytical investigation on the formation of IrO_2-based mixed oxide coatings, 615
Generalized analytical expressions for Tafel slope, reaction order and a.c. impedance for the hydrogen evolution reaction (HER): mechanism of HER on platinum in alkaline media, 631
Mechanistic study of the hydrogen evolution reaction on Ni–Zn and Ni–S cathodes, 641
Reversible ageing of iridium oxide electrodes in acidic solutions, 646
Electroformation of electrocatalytically active hydrous oxide layers on a Co–Ni amorphous alloy under pulsating electrolysis, 655

Studies of the hydrogen evolution reaction on lanthanum phosphate-bonded composite nickel-ruthenium electrodes in 1 M alkaline solutions, 684
Electrochemical and oxygen reduction behaviour of solid silver-bismuth/antimony electrodes in KOH solutions, 728
An improved method for kinetic investigations of electrochemical reactions with gas evolution, 760
Hydrogen evolution reaction (h.e.r.) in an acidic or basic medium on nickel electrodeposited with $PW_{12}O_{40}^{3-}$ and CU^{2+}, 915
Hydrogen evolution in alkaline water on cobalt electrodeposits prepared from baths containing different anions, 985
Development and evaluation of a Pt–Ru bimetallic catalyst based alkali concentrator in NaOH solutions, 1025
Structure-reactivity relationships; the oxidation of aliphatic diols on a gold electrode, 1039
Voltammetric behaviour of Ti_nO_{2n-1} ceramic electrodes close to the hydrogen evolution reaction, 1063
Ac.-impendance spectroscopy study of oxygen reduction at Nafion® coated gas-diffusion electrodes in sulphuric acid: Teflon loading and methanol cross-over effects, 1107
Preparation and catalytic efficiency of mixed noble metal catalysts on electrochemical activated carbon fibre supports, 1162

Electrochemical engineering

Reticulated vitreous carbon cathodes for metal ion removal from process streams Part III: Studies of a single pass reactor, 82
Effect of gas evolution on dispersion in an electrochemical reactor, 113
Calculation of ohmic resistance effects in rectangular electrodes of finite thickness, 443
Cylindrical three-dimensional electrodes under limiting current conditions, 707
Optimal time-varying potential control, 715
A flow-through porous electrode patented 100 years ago: the Hulin process, 853
Experimental investigation of the terminal effect in lead electrodeposition onto resistive substrates, 927
Effect of mass transfer on the current distribution in monopolar and bipolar electrochemical reactors with a gas-evolving electrode, 966
Application of metallic foams in electrochemical reactors of filter-press type Part I: Flow characterization, 1045
Polarization and back e.m.f. in electrodialysis, 1117
Current density optimization in electrochemical synthesis, 1293
Interfacial supersaturation at gas evolving electrodes, 1323

Electrochemical synthesis and production

Isolation and purification of iminodiacetic acid from its sodium salt by electrodialysis, 56
Chlorate and oxygen formation in alkali chloride membrane electrolysis, 103
Mechanistic aspects and electrosynthesis of rose oxide through anodic cyclization of citronellol, 173
Characterization of polypyrrole films incorporating various anions, 212
Advanced laboratory electrolyser for production of pure hydrogen, 241
Electropolymerization of *m*-cresol in the presence of trimethylamine, 247
Electrochemical thiocyanation by two phase electrolysis, 268
Electrochemical production of cuprous oxide using the anode-support system, 308
Characterization of membrane-electrode assemblies for solid polymer electrolyte water electrolysis, 322
Properties of polyaniline formed at tin dioxide electrodes in weak acid solution: effect of the counterion, 332
Studies on oxidation of arene by superoxide ions electrocatalysed by metallo-porphyrins, 387
The electrochemical synthesis of inorganic and organometallic complexes in non-aqueous media, 401
Preparation and use of a nickel foam electrode for the production of diacetor -2-keto-L-gulonic acid from diacetone-L-sorbose in vitamin C production, 471
Electrolytic oxidation of diacetone-L-sorbose (DAS) to diacetone-2-keto-L-gulonic acid (DAG) at a nickel foam electrode, 477
Influence of CO_2 partial pressure and the supporting electrolyte cation on the product distribution in CO_2 electroreduction, 483
Anomalous features of thallium oxide electrodeposited layers and room temperature HTSC electrosynthesis, 583
Duet electrosynthesis Part II: 1,4-naphthoquinone from naphthalene, 677
Some dynamic regression simulated equations for electrochemical doping processes of polypyrrole, 741
Electrogenerative oxidation of ferrous ions with graphite electrodes, 745
Anodic formation of polypyrrole/tungsten trioxide composites, 781
Electrochemical synthesis of eosin from fluorescein, 808
Conducting polymer films of 4(5-chloro-2-pyridylazo)-1,3-diamino benzene and its cobalt complex Part I: Anodic polymerization in aqueous solutions, 827
Electroinduced $S_{RN}1$ preparative reactions Part I: Estimation of the limiting diffusion currents on various cathodic materials in liquid ammonia and dimethylformamide, 841
Conversion of hypochlorite at a hydrogen gas-diffusion anode, 848
Electrolytic preparation of 2-osuloses: a route to *L*-ascorbic acid, 851
Analysis of flow-through porous electrode cell with homogeneous chemical reactions: application to bromide oxidation in brine solutions, 873
Development of the flow-through porous electrode cell for bromide recovery from brine solutions, 887
A novel electrochemical process for the production of ammonium perchlorate, 897
Electrosynthesis of glyoxylic acid using a continuously electrogenerated lead cathode, 905
Electrosynthesis of iminodiacetic acid from nitrilotriacetic acid, 910
Hydroxylation of chlorobenzene and phenol in a packed bed flow reactor with electrogenerated Fenton's reagent, 943
Characterization of anodically formed polypyrrole/tungsten trioxide composites, 957
Direct production of butyltin chlorides from a paired electro-organic synthesis, 975
Ozone generation via the electrolysis of fluoboric acid using glassy carbon anodes and air depolarized cathodes, 996
Electrochemical synthesis in an undivided cell of aromatic mono and dichalcogeno derivatives by $S_{RN}1$ substitution reactions in MeCN, 1125
An electrogenerative acidobasic cell utilizing biomass for the generation of electricity and molecular hydrogen, 1196
Paired electro-oxidation Part II: Production of anthraquinone in an undivided cell, 1259

Electrochemical regeneration of ceric sulphate in an undivided cell, 1301
Current efficiency during anodic dissolution of iron to ferrate(VI) in concentrated alkali hydroxide solutions, 1317

Electrochromism

Electrochromic characteristics of a complementary tungsten trioxide/Prussian blue cell, 44

Energy conversion, batteries and fuel cells

Rechargeable lithium battery anodes: alternatives to metallic lithium, 1
A unitized approach to regenerative solid polymer electrolyte fuel cells, 32
Cyclic voltammetric studies of nickel hydroxide and cobalt hydroxide thin films in alkali and alkaline earth metal hydroxides, 225
Para-nitroaniline as a depolarizer for magnesium batteries, 265
The measurement of water vapour pressure in an SOFC anode during discharge, 275
Investigation of the 1-methyl-3-ethylimidazolium chloride-$AlCl_3$/$LiAlCl_4$ system for lithium battery application Part I: Physical properties and preliminary chronopotentiometric study, 346
Magnesium/zinc-*N*, *N'*-dichlorodimethylhydantoin novel dry cells: a preliminary study, 393
Thermogalvanic cells with aqueous redox couples and temperature differences larger than 100 K, 516
Reduction of oxygen in an acidic methanol/oxygen (air) fuel cell: an online MS study, 625
Role of dissolution of Mn(III) species in discharge and recharge of chemically modified MnO_2 battery cathode materials, 693
Mechanism of the cathode reaction in sodium-ferrous chloride secondary cells, 790
Dissolution of pastes in lead-acid battery recycling plants, 819
Mechanisms of the discharge of porous-ion electrodes in alkaline medium, 947
Performance of acrylate-poly(ethylene oxide) polymer electrolytes in lithium batteries, 991
Thin-film polyaniline-polyaniline electrochemical cells, 1031
Factors affecting the characteristics of the negative electrodes for nickel-hydrogen batteries, 1051
A modelling approach to the optimization of lead acid battery electrodes, 1151
Thin metal oxide films on transparent substrates for Li-insertion devices, 1187
Kinetics of the electroreduction of anodically formed cadmium oxide layers in alkaline solutions, 1207
Modelling of the sodium-ferrous chloride electrochemical cell, 1214
Hydrated structures in the anodic layer formed on lead electrodes in H_2SO_4 solution, 1244
Ceramic electrodes for an alkali metal thermo-electric converter (AMTEC), 1251

Instruments, methods and analysis

Some *in situ* STM contributions to the characterization of electrochemical systems, 531
Automated setup for the impedance measurements of electrochemical cells with two electrodes, 553
Selective detection of acetylene gas extracted from isolation oil by an electrochemical sensor using a gold electrode, 771
An electrochemical Nafion® matrix oxygen sensor and the evaluation of oxygen permeation in coated films, 1102

Mass transfer and hydrodynamics

Determination of overall mass transport coefficients in gas diffusion electrodes, 26
Studies of space-averaged mass transport in the FM01-LC laboratory electrolyser, 38
Wall-jet electrodes: the importance of radial diffusion, 98
Mass transfer at gas sparged spherical electrodes, 167
Liquid-phase mass transfer enhancement by gas evolution at inclined plates, 463
Effect of gas evolution on mass transfer in an electrochemical reactor, 1139
A phenomenological approach to ionic mass transfer at rotating disc electrodes with a hanging column of electrolyte solution, 1181
Mass transport in a hydrogen gas diffusion electrode, 1237

Metal and alloy deposition and dissolution

On the kinetics of lead electrodeposition in fluorosilicate electrolyte Part I: Inhibiting effect of sodium lignin sulphonate, 66
Effect of added polymer traces in crystal growth: electrochemical simulation, 141
Anodic behaviour of amorphous electroplated alloy coatings, 162
The effect of dissolved oxygen on the deposition process in electroless cobalt plating, 183
Unipolar and bipolar pulsed current electrodeposition for PCB production, 231
The electrodeposition of aluminum for mixylene and ether-hydride electrolytes, 253
Numerical simulation and electrochemical drilling, 316
Influence of additives on the electrodeposition of nickel from a Watts bath: a cyclic voltammetric study, 339
Hydrogen permeation during zinc-manganese alloy plating, 358
Nucleation and growth of zinc electrodeposits on a polycrystalline zinc electrode in the presence of chloride ions, 364
Joule heating induced local electrodeposition for microelectronic circuits, 435
Activation effect of halides on chromium electrodeposition from chromic acid baths, 495
Relation between the presence of inhibitors and deposit morphology in nickel deposition, 508
Transition layer thickness in microlaminar deposits, 662
Effect of nickel on the electrodeposition of copper, 775
Maskless zinc electrodeposition assisted by a pulsed laser beam, 863
Effect of additives on the anodic codeposition of lead dioxide and polypyrrole, 922

Mechanism of the reverse dissolution of zinc in the presence of nickel Part I: influence of anodic products and substrate purity, 1011
Development of an electroless CoNiZnP solution for high coercivity films, 1083
First stages of the formation of copper electrodeposits and copper sputtered deposits on amorphous carbon and polycrystalline silver substrates, 1089
Electrochemical investigation of the autocatalytic deposition of Ni–Cu–P alloys, 1169
Electrodissolution of aluminium thin film microband electrodes, 1175
Current efficiency and crystallization mechanism in pulse plating of hard chromium, 1232
Measurement of anode potentials at high current densities by the current interruption method for metals used in aviation technology, 1263
Behaviour of tungsten carbide hydrogen-diffusion electrodes in chloride etching solutions, 1268
A modified Hull cell with forced electrolyte flow: simulation of industrial electroplating conditions, 1285

Mineral and metallurgical electrochemistry

The anode-support system: an alternative for the electrorefining of tin in sulphuric acid medium, 60
Removal of silver using graphite-felt electrodes, 390
Electrowinning of zinc at high current density in the presence of some surfactants, 763
Direct electrorefining of copper scrap using an anode-support system in a bipolar cell, 813
An electrochemical model for reduction of MnO_2 with Fe^{2+} ions, 1273

Molten salt electrochemistry

Electrical conductivity of low melting baths for aluminium electrolysis: the system Na_3AlF_6-Li_3AlF_6-AlF_3 and the influence of additions of Al_2O_3, CaF_2 and MgF_2, 78
Electrodeposition of titanium from chloride melts, 217
Aluminium deposition and redissolution at TiB_2/C composite cathodes in cryolite based melts, 257
Chemical and electrochemical behaviour of nickel ions in the $ZnCl_2$-2NaCl melt at 450° C, 735
Electrochemical formation of Ni–Y intermetallic compound layer in molten chloride, 753
Comportement electrochimique de $NbCl_5$ en milieu NaCl–KCl pur et additionne d'ions fluorure, 801
Operational characteristics of laboratory scale alumina reduction cells with wettable cathodes, 933

Thermodynamics and physical properties

Physical properties of the ternary electrolyte potassium ferri-ferrocyanide in aqueous sodium hydroxide solution in the range 10–90° C, 51
The contact angle between water and the surface of perfluorosulphonic acid membranes, 86
Determination of the diffusion coefficient of an inserted species by impedence spectroscopy: application to the $H/H_xNb_2O_5$ system, 93
Conductivity and viscosity studies of ethylene carbonate based solutions containing lithium perchlorate, 151
Determination of diffusivity and solubility of oxygen in phosphoric acid using a transit time on a rotating ring-disc electrode, 452
Evaluation of transport properties of cation exchange membranes for application in alkali concentrators, 1147

Photoelectrochemistry

Photon-driven reduction reactions on silver, 567
